

Emergency Paging Unit

DESCRIPTION

FMD 2012 remote microphone station, designed specifically for the VAIE 2250 system, enables live or recorded alert or evacuation messages to be sent out using a controlled microphone on separate zone (up to 12). The leds on the front panel provide the main information on the status of the emergency system and on any failures. Each station must be completed with an additional microphone (not included).

ADDITIONAL MICROPHONES

FMG 2000 - Dynamic gooseneck

FMH 2000 - Dynamic hand-held

EN 54-16:2008

EN 54-16:2008
Cert. Nr. 0068-CPR-044/2016

Declaration of Performance (DoP)

10. In & out connectors.
11. Buzzer switch.*
12. Zone selection keys with status indicator LED.

*For exclusive use of installers, please refer to the instruction manual of the microphone station.

CONNECTIONS

These stations must be connected to the “EMERGENCY UNITS” connectors of the VAIE 2250 system. It is possible to connect up to 7 remote stations in cascade formation.*

IMPORTANT | The connections to the stations are made by means of CAT5e SF/UTP shielded cable and a shielded STP connector.

* According to the specifications of each system, it could be necessary to provide an external power supply through the appropriate local socket.
