

# Active Column Line Array

## MAIN FEATURES

- 2 way bi-amplified line array column
- 0,47" birch plywood with scratch resistant varnish
- 2 x 6,5" custom woofer with 1,5" voice coil
- Neodymium B&C compression HF driver with 1,4" throat and 2,5" voice coil
- Class D 600W RMS amplifier for LF and 300W RMS for HF
- DSP processor with 8 equalization presets
- 100°H x 25°V dispersion
- Ideal for both live applications, assisted by the CLA118SA active subwoofer, as well as for fixed installation
- Completely Manufactured in Italy

## DESCRIPTION

The FBT VERTUS CLA 206A two-way bi-amplified speaker system incorporates 2 x 6.5" custom woofers with 1.5" voice coils and 1 x 1.4" B&C HF neodymium driver with a 2.5" voice coil. The internal Class D amplifier module, constructed in die-cast aluminum, delivers 600W for LF and 300W for HF. A DSP processor with 8 equalization presets provides impressive dynamics for a system of these dimensions. The FBT VERTUS CLA 206A meets the following performance criteria: frequency response from 65Hz to 20kHz, maximum SPL of 133dB, horizontal coverage angle of 100°, and vertical coverage angle of 25°. The FBT VERTUS CLA 206A features a 0.47" birch plywood cabinet with internal metal bracing, and the front is protected by a heavy-duty metal grille. The control panel provides Level control, HF level adjustment, Preset selection, HP filter, Ground lift, and three status LEDs (on, peak, prt/limit). It also includes XLR input and link connectors, and a Neutrik PowerCon Duplex connector for power supply. New hardware is available for flying installations, ground setups, and the possibility of coupling two or more FBT CLA 406.2A / CLA 206A with an angle from 0° to 20° (top side inclined 20°). This system can be integrated elegantly and with minimal intrusion into any environment. It can be used both in small point-source systems with the VERTUS CLA 118SA subwoofer or in clusters of two units to achieve a vertical dispersion of 40°.
